

## Club Parramatta, Parramatta, NSW

Club Parramatta is adjacent to Bankwest Stadium, Westmead Hospital, Westfield Parramatta and Parramatta Train Station. Recently built on the former Parramatta RSL site, Parramatta Club has history of bringing the local community together.

### Project Design Brief

With the introduction of new pavement finishes throughout the site, designers did not want service covers to be an eyesore. New infrastructure was required for additional lighting, communications and security coverage, requiring several new cable pits.

### ACO's Solution

- **Rhinocast®** single part recessed access cover with brass decorative edge

### Benefits

- Infill access covers allow pavers to be installed in them for a harmonious finish with the adjacent pavement
- The 40mm stainless steel decorative edges provide a uniform aesthetic finish
- Access covers load rated to Class B (AS 3996)

### Other ACO products used

- Trafficable cable enclosures (ACO Cablemate®)
