

Karrinyup Shopping Centre, Perth, WA

Built in 1973, the Karrinyup Shopping Centre recently underwent a \$800M overhaul, ranking as the largest redevelopment of a shopping centre in Australia. Today it serves as a mixed retail and business precinct comprising over 300 stores and a floor plan that has doubled in size. It is one of Perth's central destinations for fashion, dining, lifestyle and entertainment.

Project Design Brief

To improve and extend key services across the centre, new cable infrastructure was required for lighting, communications, and CCTV coverage. Several new cable pits were specified to house these services, with designers wanting covers to blend in with the surrounding floors and pavements.

ACO's Solution

- Single part [Rhinocast®](#) decorative edge access covers.

Benefits

- [Rhinocast®](#) infill covers provide a 40mm high stainless steel decorative edge allowing the cover to be filled with the adjacent paving material. This provides a discreet and uniform finish.
- All access covers are thirty party certified to AS 3996.

Other ACO products used

- Trench drainage systems ([ACO Drain](#))
- Stainless drainage channels ([ACO Stainless](#))
- Cable pits ([ACO Cablemate®](#))
- Grease Traps ([ACO Passavant](#))
