## Ipswich Motorway Upgrade

*The Queensland Department of Transport and Main Roads have recently upgraded the Ipswich Motorway which links Ipswich to Brisbane.*

*A unique component of the project was the in-filling of abandoned coal mines in areas of Redbank Plains and Goodna under which the new motorway and structures were built.*

*Designers were faced with the challenge of maintaining access to existing public infrastructure. ACO's Rhinocast® ductile iron access covers in various sizes were therefore specified to meet the projects requirements.*
