Terminal 2, Perth Airport

Terminal 2, Perth Airport is a newly constructed building to cater for the city's increase in demand for regional flights to service the mining sector. Its gates are leased by Virgin Australia, Tigerair and Alliance Airlines.

Large pavers were selected for the plaza in front of the terminal and tiles for its internal areas.

To allow access to the building's cables, ACO's Rhinocast® cover and frame systems were specified with stainless steel decorative edges. This provides an attractive restraining edge for the ceramic tiles thereby preserving the visual continuity of these gridded walking surfaces.
