## The Village at Yeronga

*For 35 years, The Village Retirement Group has been undertaking construction developments around South East Queensland. The Village Retirement Group comprises 1200 retirement units presently being developed within a 5km radius of Brisbane's CBD.*

*During planning, it was decided that most of the community facilities would be constructed during the first stage of the project where electrical infrastructure was required.*

*ACO configured a 24 part multi-part Rhinocast® access cover for a substation in a basement so that each cover met minimum weight requirements. In addition, ACO also supplied designers with rebate drawings customised for the suspended concrete slab design.*
