Dear Sam

**ACO DUCTILE IRON ACCESS COVERS AND FRAMES
ACCEPTANCE FOR USE ON VICROADS PROJECTS**

I refer VicRoads letter dated 5 July 2001 regarding agreement to the use of a number of ACO ductile access covers and frames on VicRoads projects.

I have since received updated evidence that:

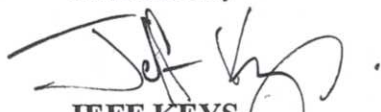

- (a) ACO Polycrete Pty Ltd has a quality certificate of registration to ISO 9001:2000, No. QEC1883 dated 6 June 2006;
- (b) ACO Polycrete Pty Ltd has documented inspections of incoming products for which tests have been carried out by an independent testing authority;
- (c) The ductile iron access covers listed on the StandardsMark Schedule meet the current Australian Standard AS 3996. All covers have passed the required criteria given for proof and type testing;

I am pleased to inform you that, subject to the agreement of the Superintendent on any particular contract, there is no objection to the use of the ductile iron access covers listed on the StandardsMark Schedule, as manufactured by Weifang Yucai School of Foundry, on VicRoads projects.

Please note that this acceptance will lapse if:

- The product or its sources change;
- The product ceases to meet acceptance or no longer meets in-service requirements; or
- The registration requirements are changed.

Yours sincerely

JEFF KEYS
PRINCIPAL ROAD DESIGN ENGINEER
